

Weights of some of the parts

Station 6 after the holes have been cut 1005 grams

Station 8 inc. both halves 934grams

Toes rail 1012 grams each

Bevel block for sheaves 58 grams each

Cleat bevel for clam with t-nuts 72 grams each

All three sets of partial bulkheads 902 grams

All eight soldiers 338 grams

Daggerboard trunk / mast step (this is the old style and no longer applicable- 1878 grams

Transom bar 990 grams but I think this is a bit too heavy. Around 900 is probably about right.

Center rail with t-nuts and vang pedestal 525 grams

You will be saving weight over what I was able to build because your launcher throat and spin pole are lighter by a significant amount.

Please let me know if you have trouble approaching these weight (more than 10% over).
